NOTE: IF ANY OTHER VALUES ARE SHOWN IN THESE TWO CODE POSITIONS, YOU SHOULD **IGNORE** THEM. FOR YOUR PURPOSES, IT MEANS THAT SSA DOES NOT HAVE A STATE/COUNTY CODE FOR YOU.

NOTE: It has been determined that the zeros are present on the DMF when a Date of Death is deleted. This occurs whenever a correction is made to a previously reported death, whether or not the corrected death was related to our special death processing run. In other words, whenever a previously reported death is corrected, NTIS receives a correction in their regular update files which includes zeros in the data of death along with a “delete” indicator. Customers should be processing these records using the “delete” indicator along with the zeros to remove any previously reported death from your versions of the DMF. If there is no previously reported death in your records, you should remove the deleted record from your version of the DMF.
